

AI Usage Report

AI Tools Used

- **Primary tools:**
 - ChatGPT
 - GitHub Copilot
 - Cursor IDE (minimal)

Key Use Cases

- Helped scaffold reusable components like chart cards and data tables
- Generated export logic (CSV, PDF with jsPDF)
- Assisted with Tailwind layout suggestions and utility class organization
- Supported debugging and fixing TypeScript + ESLint issues

Sample Prompts

1. "Create a responsive dashboard layout using Tailwind and shadcn/ui"
2. "How to export a table to PDF in a React + TypeScript project?"
3. "Build a pie chart using Recharts with custom colors and labels"

AI vs Manual Work Split

- **AI-generated:** ~60%
 - Chart scaffolding, utility functions, export logic, layout inspiration
- **Manual coding:** ~40%
 - Data integration, theme customization, dark mode, filters, interactivity
- **Customization:**
 - All AI suggestions were tailored to match the ADmyBRAND visual theme, responsive breakpoints, and branding. Final layout, animations, and UX were manually refined.
